

MOHAMMED SHAREEF M

PYTHON DJANGO DEVELOPER

📞 9605511369

✉️ shareef.mk03@gmail.com

📍 Kochi, Kerala

PERSONAL PROFILE

Self taught and determined Python-Django full stack developer with strong analytical skills and a knack for creating robust solutions in least amount of time. Developed an E-commerce web app, Q and A portal. I am seeking a role which allow me to continue my growth as a developer as I provide high quality work.

PROJECTS

Ticker (E-commerce Web Application)

An Ecommerce web application that focuses on sales of watches. Users can purchase watches in different categories. User can purchase with different payment methodes like cash on delivery and online payment methods like paypal and razorpay. The cart is managed for guest and authenticated users seperately. The user registration is managed with verification of phone number and referal code can be used to get additional benefits. Since it is a single vendor platform the admin can add and manage the products from the admin panel.

Technical:- Clean architecture, Django, PostgreSQL, RazorPay, PayPal, AWS S3, Social Authentication with Google and Facebook.

Git :- <https://github.com/shareefmhd03/Ticker-django>

Knowledge (Q and A Web Application)

Q and A portal where users can ask questions related to tech and get answers from other users. It is similar to stackoverflow along with Tutorials on different tech topics and Challanges module like a competitive coding platform with the help of online compiler API. Web Socket is used to create a chat module where users can chat with each other. With the help of django webpush the push notification is implemented where the users can get notified when their questions get answered by someone.

Technical:- Clean architecture, Django, PostgreSQL, AWS S3, WebSocket, Django Channels, Daphne, Google and Facebook authentication, Compiler API(jdoodle).
